dasvaus

Dasvaus is an independent Brazilian brand focused on accessories with a timeless design and an aesthetic that blends pure forms with influences from Brazilian modernism.

Founded in 2020, amid the pandemic and in a fishing region in southern Brazil, the colors of the boats and the limited resources available there served as the foundation for the brand's principles. Dasvaus uses unconventional materials for handbags—such as waterproof canvas and automotive felt— which are, however, common in the daily life of cities and of that local community.

The brand's mission is to develop smart, versatile accessories that express the fluidity of contemporary style, valuing pure forms, balanced proportions, and the essence of materials—highlighting what is essential with authenticity and purpose.

Feet of Tomorrow

Founded in 2021, FOT was born with a simple and essential purpose: to reconnect people with their own bodies and the world around them through movement.

We are a Brazilian brand of minimalist barefoot footwear. Our shoes respect the anatomy of the feet, encourage a more natural gait, and offer a new way to walk - with freedom, awareness, and presence.

We combine minimalist design, human-centered technology, and high-quality materials to create footwear that works as an extension of the body, not as a barrier.

We don't follow trends. We create what we believe in.

Free feet. Active body. Light mind.
NO WAY BACK.
